

# PgLONDON2015

23<sup>RD</sup> - 25<sup>TH</sup> JUNE 2015

## 2ND INTERNATIONAL CONFERENCE ON *PORPHYROMONAS GINGIVALIS* AND RELATED SPECIES IN ORAL AND SYSTEMIC DISEASES

### About the Conference

I am delighted to announce details of PgLondon2015: the 2nd International Conference on *Porphyromonas gingivalis* and related species. Research into the periodontal microbiome continues at pace, fuelled not only by rapid advances in technology but also our increased broader understanding of the microbial communities associated with humans and their pivotal role in both the development of disease and the maintenance of health. The aims of this two day international conference are to present the very latest research findings in periodontal microbiology with complementary presentations from experts in related disciplines. The conference will be of interest to not only the oral microbiology and periodontal disease research communities but also the wider discipline of host:pathogen interactions between complex microbiota and the human host.

### Professor Mike Curtis,

Dean for Dentistry & Deputy VP (Health), Barts and The London School of Medicine & Dentistry  
Co-convenors: **Professor Koji Nakayama (Japan) & Professor Eric Reynolds (Australia)**

### Session Titles

- Advances in Understanding the Oral Microbiome
- Dysbiosis of Commensal Microbiota and the Development of Human Disease
- Physiology of *P. gingivalis* and related organisms
- Periodontal Bacteria and Systemic Disease
- Host-pathogen interactions
- Prospects for Treatment of *P.gingivalis* associated disease
